

GREENSTAR COMPLIANCE

To whom it may concern

Statement by Martini Industries Pty Ltd; Manufacturers of Polymax Insulation products

Polymax Insulation is manufactured by Martini Industries Pty Ltd using 100% polyester fibre, with a minimum 85% recycled content.

The products are heat bonded and require no chemical binders.

Polymax products do not contain ozone depleting substances or generate ozone depleting gases.

No ozone depleting gasses are used in the manufacturing process.

Polymax products contain no chemicals or harmful VOC.

The manufacturing processes are not considered to be energy intensive.

Our products have low embodied energy due to the high percentage of recycled material used

The manufacturing process is zero waste and all process trim and off cuts are immediately recycled back through the system.

All packaging materials are fully recyclable.

This statement is issued in conjunction with the Polymax Insulation MSDS.
